Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 6-10, 12-14, 16, 17, 19, 21, 23-36 and 28 are rejected under 35 U.S.C. 102(b) as being anticipate by Nunez.

See Fig. 2 where a trap has an inlet from 18, an outlet 32 and an insert 20 which due to its integral nature (pg 2, paragraph 20), is “non-removably secured to the body”, which is 24. Re: claim 8 see paragraph 21, line 2.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4, 5, 11, 18, 20 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nunez, as applied supra, in view of Nance.

To provide for the former to be cast, as taught by the latter at lines 78-79, would have constituted an obvious expedient of choice in design. Re: claim 11, to manufacture the insert and body separately such as taught at 16 and 22 of Nance would have constituted an obvious expedient of choice in design as well.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claim1 above, and further in view of Carter.

Carter teaches a conventional "insert lining" at 11 of Fig. 2. To employ such a well known pipe sealing expedient in the Nance device would have constituted an obvious expedient to the ordinary artisan.

In view of the application of new art, this action is not made final.

Nance '712 shows another trap insert 11.
